

- **Chemical injection**

Dosing pumps and feeding pumps are oscillating displacement pumps for the dosing and feeding of liquids in all industrial fields. We Provide dosing pumps for nearly all flowing media, even with aggressive, abrasive, odorous, radioactive, inflammable, viscous or toxic properties - reliably and safely!

- a. Demulsifier injection
- b. Corrosion inhibitors
- c. Methanol system
- d. Chlorine dosing
- e. Sodium hypochlorite (NaOCl)
